

DON HOLLOWELL

Nassau Bay Mayoral Candidate

Cathy and I moved to Nassau Bay from West Houston over five years ago. We were impressed with Nassau Bay and decided that it would be the ideal area to live. We would be next to our daughter Sarah and our three little grandchildren. I was quite happy to get out of the City of Houston.

The City has improved our neighborhood by improving and maintaining the parks and storm water drainage system after the last big water event. The work that has been done by our current city management team has been good. There is still more renovation and upgrading that needs to be done in those & more areas. In order to preserve and increase all of our property values, we need to start looking at the homes in our neighborhood that have not been maintained properly. There are a number of properties, mostly

rentals and vacant homes, which have exterior maintenance issues that include landscaping mowing & trimming neglect. Distressed homes do not enhance the surrounding property values. The City has been trying to address some of these problem areas, but also could use a great deal more forward and aggressive planning and action.

1965 to 1970

Chemical Engineer
Department of Defense
